

ELECTRICAL SAFETY AWARENESS TRAINING

Electrical Safety Awareness Training is an essential element in preventing possible life-altering injuries, fatalities, citations, and property damage.

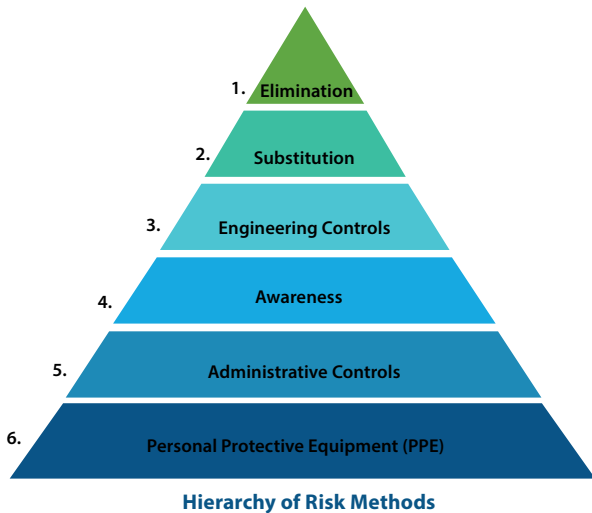

This 8-hour session will provide an understanding of the NFPA 70E, how it relates to NEC and OSHA procedures and how to use this information to keep your employees safe and your facility in compliance. We also offer a 4-hour refresher class.

Our professional training staff brings years of real-world experience to the classroom, assuring that our sessions will have a positive impact on your electrical safety.

We offer easy on-line registration, and we also provide on-site, customized sessions.

Per NFPA 70E

“Retraining shall be performed at intervals not to exceed 3 years.”

RESA Power Service specializes in electrical power solutions to ensure safe, efficient, and reliable generation, transmission, and distribution of your power system. We have provided electrical solutions to thousands of companies throughout the United States and Canada on both a routine and a 24/7/365 basis since 2003.

We are a NETA-accredited company - which means you are partnering with a company that provides the highest level of safety and reliability. Our work is 100% guaranteed.

ELECTRICAL SAFETY & MAINTENANCE

We can help you meet the industry standards

ELECTRICAL SAFETY ASSESSMENT

Our complimentary on-site Electrical Safety Assessment will identify potential hazards and OSHA/NFPA 70E violations. This consists of a review of the following major items.

- ✓ **Engineering Documentation, Including One-line Drawings**
- ✓ **Most Recent Arc Flash Hazard Analysis**
- ✓ **Personal Protective Equipment (PPE)**
- ✓ **Preventive Maintenance Practices and Procedures**
- ✓ **Safety Training Program**
- ✓ **Warning Labels**

Based on the findings of this Electrical Safety Assessment, we will provide comments and recommendations regarding your facility. The Electrical Safety Assessment and all recommendations are based on industry-wide consensus standards.

ARC FLASH HAZARD ANALYSIS

Arc Flash Causes hundreds of fatalities and thousands of injuries each year. We will help you build an effective Electrical Safety Program that meets the requirements of OSHA and NFPA 70E Standard for Electrical Safety in the workplace.

Are you compliant? It is important to have an on-site arc flash and compliance assessment of your workplace performed to identify potential hazards. An arc flash risk assessment can help you meet OSHA standards and improve safety. Our experts will help you determine shock and arc flash protection boundaries, hazard class, PPE requirements, potential, incident energy levels and more.

An arc flash risk assessment can help you identify NFPA 70E standards and improve electrical safety in the workplace.

ELECTRICAL MAINTENANCE AND SERVICE

Preventive and predictive maintenance is key to keeping your employees safe and your facility up and running. We will develop a PM program for you based on NETA recommendations.

Our Specialties include:

- **Transformer Services**
- **Switchgear Services**
- **Cable Testing**
- **Infrared Inspection**
- **On-site or In-shop Testing and Repair**
- **Acceptance Compliance and Commissioning Testing**

We will help you comply with industry standards:

OSHA 1910.303(b)(1) Electric equipment shall be free from recognized hazards that are likely to cause death or serious harm to employees.

NFPA 70E 205.3 Electrical equipment shall be maintained in accordance with manufacturers' instructions or industry consensus standards to reduce risk or failure and subsequent exposure of employees to electrical hazards.
