-  New & used transformer sales. Emergency transformer rental.
-  Energization & switching. Collection cable testing. Power system troubleshooting. And more...

RESA POWER™

Reliable and Safe. The Power of Us.

✓ WHY CHOOSE RESA POWER?

RESA Power combines the national access and expertise of a large-scale provider with speed and service quality of a trusted local partner.

RESA Power offers full in-house manufacturing capabilities in several locations for switchgear, breakers, panelboards, MCC, transformers, and other power equipment.

RESA Power is OEM brand agnostic and routinely refurbishes equipment from all major OEMs. We often partner with OEMs to meet aggressive turnaround deadlines their own factories are not able to meet.

RESA Power has a wide variety of vertical market customers throughout the U.S. & Canada outside of the renewable energy industry that we service on both a routine and a 24/7/365 basis since 2003.

RESA Power's NETA Certified Technicians will analyze your equipment, make recommendations, and perform power services that you need to assure the longevity of your electrical assets.
