

NEED TRANSFORMERS?

OUR RE-MANUFACTURED TRANSFORMERS PROVIDE THE SAME PERFORMANCE AS A NEW TRANSFORMER AT A MUCH LOWER COST

The main advantage is RESA Power's fast turnaround - we can have a re-manufactured transformer shipped in one third of the normal delivery time of a new unit.

- ⚡ Our team of experts takes pride in refurbishing and testing each transformer to ensure it meets or exceeds industry standards.
- ⚡ Don't let the cost of a new transformer hold you back from powering your facility. Choose RESA Power for cost-effective solutions without sacrificing quality or performance.

- ✓ RESA Power transformer re-manufacturing service offers a new lease of life for your used transformers, enabling them to be completely rebuilt or even upgraded to a higher specification.
- ✓ The cost of RESA Power's remanufactured transformers will vary, but on average expect to be back in service at around 60 to 70% of the cost of a new unit.
- ✓ RESA Power can have a remanufactured transformer shipped in just a matter of weeks - a fraction of the extended delivery (as much as several months or years!) schedule now being quoted for new small and medium power transformers.

REMANUFACTURING

RESA Power's Remanufacturing Program Includes:

- ⚡ All customer units brought in for repair will have as found testing
(TTR, Insulation Resistance, Winding Resistance, Power Factor)
- ⚡ Top cover removed
- ⚡ Insulating fluid removed
- ⚡ Internal inspection performed
- ⚡ All bushings are removed and cleaned
- ⚡ All gaskets are replaced
- ⚡ All threaded fittings are removed, cleaned and reinstalled
- ⚡ Unit is tested to assure proper connections
- ⚡ Reman units are filled with processed lab tested batch oil
(Baseline report attached to each unit)
- ⚡ Top cover is reinstalled
- ⚡ 5 psi pressure test is performed

Electrical Tests Per NETA Standards:

- Insulation Resistance (Polarization Index)
- Winding Resistance
- Turn-to Turn Ratio
- Power Factor Excitation (Power Class Units)
- No Load Energize
- Oil Analysis (As Shipped)
- Bushing Hot Collar (If applicable)
- Bushing Capacitance Test (If applicable)
- Auxiliary Checks (If applicable)

RESA Power Is Proud to Offer:

- Removal of Core and cCoils for Water/Rust Situations or Other Repairs
- Sandblasting and Paint
- Fabrication and Replacement of Severely Depleted Metals
